Press Release

Healthcare Facility Brings New Health Services to Dayton
OmniPoint Health to Offer Wide-Variety of Care Close to Home

DAYTON, TEXAS (July 26, 2021) – The new OmniPoint Health facility opening in Dayton will bring a variety of health services to the area, eliminating the need to travel outside the city for high-quality care.

The facility, which opens September 1, will offer new services that aren't currently available in Dayton. Residents will now have local access to new offerings:

- **On-site Diagnostics** – includes radiology (X-rays) and diagnostic lab work, such as rapid testing for strep, flu, RSV or COVID-19
- **Counseling** – all ages can visit a licensed professional counselor on-site
- **Smoking Cessation Program** – participants receive free nicotine replacement therapy delivered by an M.D. Anderson-trained licensed professional counselor

In addition to new services, the primary care facility will give Dayton residents more options for their healthcare needs with a medical group dedicated to offering world-class care. Patients can expect personalized care for routine medical visits, including wellness exams, physicals and chronic care management from board-certified providers.

On-site lab services such as routine blood work (complete blood counts, metabolic and lipid panels, thyroid testing, urinalysis, etc.), immunizations, wellness programs, sports physicals and women's health services will also be provided.

"In the past, Dayton area residents have had to travel to Baytown, Atascocita or even Houston to receive these services," said William Kiefer, Chambers Health Chief Executive Officer. "By offering high-quality care locally, we can save our patients both time and money, adding to their overall quality of life. Less time on the road means more time doing what they want to be doing. That is the kind of personal service we are dedicated to providing our patients."

With more than 4,000 square feet of space, 10 examination rooms and one procedure room, OmniPoint Health will be able to take new patients, offer same-day appointments and have low wait times. The facility is the first of its kind for the Dayton area. It is convenient in location and provides a one-stop-shop for testing and other medical needs.

On August 2, new patients can start setting up appointments in anticipation of the facility's September opening in the Prairie Center, off Hwy 90. Hours of operation will be Monday through Friday from 8 a.m. to 5 p.m., with future plans to offer services after hours and on weekends.

Chambers Health announced earlier this month its intention to change its name to OmniPoint Health. The new name will make its debut in the Dayton location with the remaining facilities changing in January 2022. The new name comes as the company expands its services beyond Chambers County and reflects its new mission to exemplify medical excellence with the same personalized service, love and treatment they would entrust to their own families.

About OmniPoint Health:

World-Class Care. Hometown Service. OmniPoint Health is the premier people-centric healthcare provider, exemplifying medical excellence with the same personalized service, love, and treatment we entrust to our own families.

Founded in 1950 in Anahuac, Texas, with a hospital along Trinity Bay, the healthcare system has since expanded to include primary care, dental and wellness facilities in the Chambers – Liberty County region. Our vision is to become the world's finest health system by serving as the catalyst for individuals to live active, happy and productive lives.
